Summary	<p>A motivated 5th-year Software Engineering student at Addis Ababa Science and Technology University with a strong foundation in problem-solving, algorithms, and collaborative software development. Good foundation in programming languages such as python, C++, Java, HTML, CSS, and JavaScript, with experience designing efficient solutions and building innovative applications. Passionate about continuous learning, teamwork, and creating impactful software solutions in dynamic environments.</p>	
Experience	<div><div>Efyuye Gela Technology Event and Consultancy</div><div>June 11, 2025 - September 4, 2025</div><div>Internship, Backend developer</div><div>Piassa</div><div><div></div><div>https://efuye-gela-lovat.vercel.app/</div></div></div> <p>During my internship , I worked as a Backend Developer, gaining hands-on experience in full-stack development. My role involved designing and implementing secure backend APIs using Next.js, Prisma ORM, PostgreSQL, and JWT authentication, while integrating Supabase for real-time synchronization and deploying the system on Vercel. In my capstone project, (a real-time chat application), I applied all these technologies to deliver features such as user authentication, profile management, group creation, and real-time messaging. This project strengthened my expertise in backend engineering, authentication, and scalable application design, while also enhancing my teamwork, problem-solving, and project management skills.</p> <p>capstone project link : https://chat-app-b12t.vercel.app/</p>	
Education	<div><div>Addis Ababa Science and Technology University</div><div>April 2022 - Present</div><div>Software Engineering</div><div>Bachelor’s Degree</div></div> <p>Relevant Coursework:</p> <p>Data Structures and Algorithms, Advanced Programming, Operating Systems, System Design, Object-Oriented Programming, Computer Networking, Computer Graphics, Computer Organization and Architecture, Software Requirements Engineering (SRE), Software Quality Assurance and Testing (SQAT)</p>	
Projects	<div><div>Chat-app</div><div>June 11, 2025 - September 4, 2025</div><div>A full-stack chat app with real-time messaging</div><div><div></div><div>https://chat-app-b12t.vercel.app/</div></div><div>a full-stack chat platform enabling secure user authentication, profile management, group creation, and real-time messaging. Built the project with Next.js, Prisma ORM, PostgreSQL, and JWT authentication, integrated Supabase for real-time synchronization, and deployed on Vercel.
